

### Depth Movement

This is an intense and dense group, dynamic class. It is about energy, about constantly challenging your limits. Understanding what defines you as a dancer and pushing those boundaries over and over again. Allowing the environment to influence your dancing skills, refining tools to create new movement qualities and new rhythms. Digging deeper inside the range of your own personal dance vocabulary, becoming anyone or anything. Working with partnering, a multi-directional micro-narrative movement to transforming as a whole group. Learning how to effectively be unpredictable, how to recycle energy, how to use the body as your primary tool. I guarantee a new process of study in which I go as a teacher and guidance parallel to your learning process and makes you do the step of digesting the work to get a completely new level.
